

Embed Code:

What is an Embed Code? It's HTML code that adds a widget, plugin, video, social media feeds, and many other things to a page on our website.

How do you get the Embed Code? You can get embed code from a variety of places. Whether it be a video from youtube, or a social media feed from Facebook. Most place provide you with the embed code or widget code that you can easily copy.

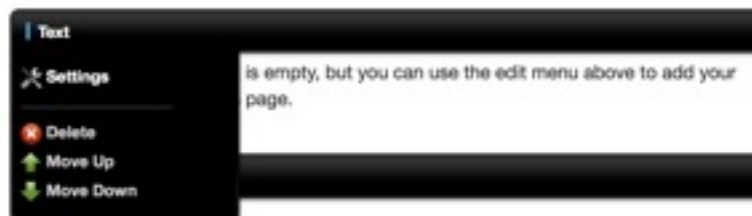

How do I get it on my website? You can easily get it on your site by copying the embed code and pasting it on the HTML side of a text element. See detailed instructions below:

Step 1: Copy Embed Code

Step 2: Login to your website and add a text element where you want your embed code to appear. To do this click "Add Element" > Select "Text" in the drop-down > Click "Add"

Step 3: Hover over "Text" and click on "Settings"

Step 4: Click the HTML tab at the bottom of the Content box and then paste the embed code. Be sure to save your changes. See example below:

Paste Embed Code

Content

```
<div class="videoWrapper"><frame width="560" height="315" frameborder="0" src="http://www.youtube.com/embed/H542nLTTbu0?rel=0"></frame></div>
```
